And Supposing You, Too, want to know about

*It is knowledge
that will point
the way to future
progress at a
profit.*

the resin content of different rubbers, its vulcanization behavior, its tackiness or the influence of metallic salts!

Or supposing you want to know about hot or cold vulcanized rubber goods or the arrangement of a rubber factory, about sheet packing, textile lined rubber hose, conveyer belts, or even erasing rubber.

All such subjects are interestingly discussed in Gottlob's "Technology of Rubber."

This mighty useful and handy book, with many illustrations and printed on fine coated stock, contains over one thousand articles covering the general manufacture and technology of rubber. It is valuable to all rubber men and especially to those practical fellows wanting to know the various processes of rubber manufacture and its chemistry.

The Price is but

\$10.50

post-paid

= Important Announcement

BEGINNING with the May issue of INDIA RUBBER WORLD "Compounding Latex," by Joseph Rossman, Ph.D. . . .

A series of technical articles abstracted from United States patents granted for the application of rubber latex in many diversified industries.

These timely articles can be had only by subscription to INDIA RUBBER WORLD. \$3.00 in U. S.; \$4.10 to Canada; \$3.50 all other countries.

INDIA RUBBER WORLD
420 Lexington Ave., New York, N. Y.

Gentlemen:—I would like to have a complete file of the LATEX COMPOUNDING ARTICLES being published in INDIA RUBBER WORLD. Enclosed please find in full payment for the next 12 issues which send to my address as follows:

ANOTHER milestone in its successful career as an outstanding journal of the rubber industry has been passed by INDIA RUBBER WORLD, which in 1889, 43 years ago this month, issued its first number.

The rubber industry has witnessed many remarkable developments and unprecedented expansions during the long life of this journal.

All through these significant years INDIA RUBBER WORLD has faithfully and authoritatively recorded this great progress to offer to all those interested much invaluable datum not readily available elsewhere on all phases of this essential industry in every country where rubber is cultivated, manufactured, or utilized.

With justifiable pride INDIA RUBBER WORLD surveys its past achievements. Yet this feeling is tinged with the hope that those friends who have made possible its longevity will continue to make it the largest and most influential journal of the rubber industry—their spokesman and servant, a position INDIA RUBBER WORLD truly appreciates.
